Office of Admissions
America University School of Medicine

Dear Admissions Committee,

My name is *Abc Def* (AAMC ID:), and I am writing to convey my continued interest in interviewing at American University School of Medicine. Thank you for your continued consideration.

Over the course of the past *X* months, I have continued to challenge myself inside and outside the classroom. Advanced courses such as *XYZ* and *GHI* have tested my ability to apply my knowledge at a much higher level. For example, describe here how you have continued to challenge yourself intellectually.

Additionally, I have continued to volunteer at the *xyz* hospital / institution. During my time, I...describe what you have been doing AND how you have been impacted – what you learned. As President of *ABC* student org, I ...describe what you do in your position of leadership / position of responsibility, what you have learned and how it has impacted you. Describe any future experiences you have planned, why and what you expect to draw from those experiences. Collectively, these experiences, which focus on academics, service, and creative pursuits, will enable me to continue to take full advantage of my CMU experience in preparation for transitioning to medical school.

Finally, end with a few sentences that describe strengths about the med school program that you are aware of from your research and how these programs or opportunities align with what you hope to continue building or learn more about while in med school.

AU SOM demonstrates its dedication to helping the community by teaching students about ethics, culture, barriers in medicine, diversity, research...name a few important and relevant topics to AU SOM here. Also, with a diverse patient population and a focus on team work exercises, I believe AU SOM will be a school where I can grow as a medical student and contribute meaningfully to the surrounding community.

I appreciate your time and hope to hear from you soon.

Sincerely,

Name
