

# UNDERGRADUATE PROGRAMS

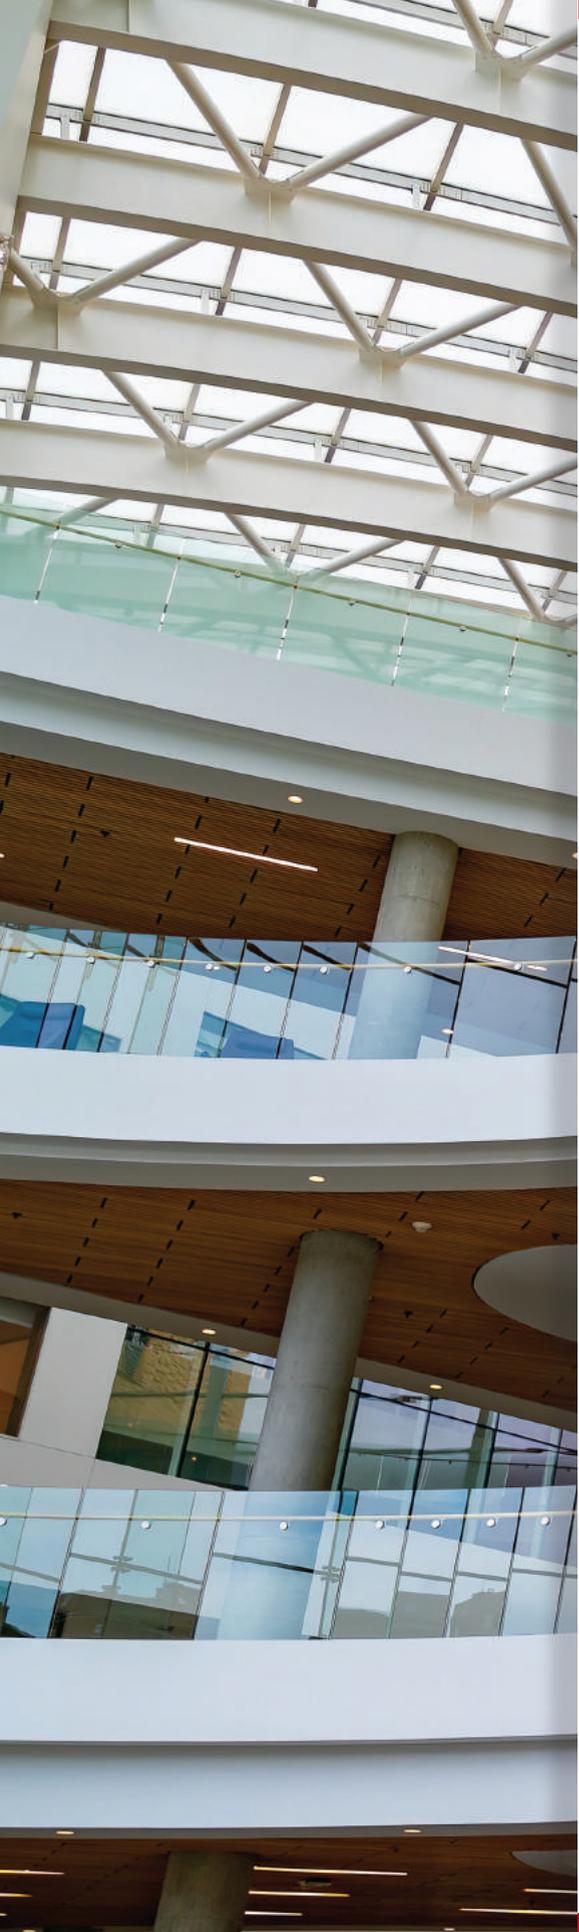

Carnegie Mellon University  
Tepper School of Business

Your future starts now.

## THE INTELLIGENT FUTURE<sup>SM</sup>

The world needs thinkers and entrepreneurs who thrive where data and humanity connect: It calls for leaders with imagination, ambition, and a collaborative spirit.

At the Tepper School, we're on a mission to build the leaders of tomorrow. We're not just navigating what's new. We're imagining what's next.

Join us in The **Intelligent** Future.

At the Tepper School, our curriculum is designed to prepare you to become a next-generation leader.

Here, you will explore the unknown and examine new possibilities. If you are curious, open-minded, and interested in tackling complex problems, **the Tepper School is the place for you.**

Our undergraduate degrees in business administration and economics are designed to provide you with a solid foundation in business, economics, mathematics, and statistics. Building upon your core classes, you'll be given the flexibility to pursue your academic and professional goals.

As a Tepper School student, you'll have full access to everything Carnegie Mellon has to offer. Choose a specialized area to concentrate in or complete a minor in another academic department. Build your technical skills, foster your creativity, deepen your cultural awareness, and dig into a new subject area through other Carnegie Mellon schools and colleges.

## Alexandria Donohue

Santa Ynez, CA | Class of 2023  
Major: Business Administration  
Minor: Policy and Management

**“Tepper students leave this program with considerable quantitative skills and experiences, something that is unique among undergraduate business schools. This gives us a leg up in the real world.”**

In her internship with Verizon’s finance leadership development program, Alexandria was assigned an internal consulting project to analyze sales for one of the company’s products. Drawing on the fundamentals she learned in her Tepper School coursework, she tackled both the quantitative and qualitative parts of her project with confidence — from analyzing large volumes of data to presenting strategic recommendations to top-level executives.

## Ayushi Ray

she/her | Cupertino, CA | Class of 2023  
Major: Economics | Minors: Business Administration, Policy and Management

**“One of the things that stands out about Carnegie Mellon’s economics program is that a lot of courses are offered through the Tepper School. I’ve been able to dabble in all sorts of learning environments and become a well-rounded graduate.”**

As a highschooler, Ayushi knew she wanted to major in economics. But she was searching for a program that would give her flexibility to explore the field through both a humanities and a business lens. She found that opportunity at Carnegie Mellon. Through her interdisciplinary coursework

at the Tepper School, Ayushi has mastered statistical and quantitative skills and discovered a new passion for digital marketing. Her summer internships at tech companies Lucid, NetApp, and Oracle have solidified her decision to pursue a career in marketing after graduation.

## Take your learning to the next level.

Becoming a changemaker in your field requires more than attending lectures, studying, and acing your exams. To develop into a forward-thinking leader, you need to learn by doing and reflecting.

At the Tepper School, experiential learning is embedded throughout your experience. Our curriculum includes project-based classes that provide hands-on applications of your area of discipline. As you continue your academic journey, you may engage in case competitions, student research opportunities, industry visits, or study abroad experiences to deepen your knowledge in your field.

You'll learn to ask the right questions, propose solutions, and meaningfully analyze your results and experiences. By the time you graduate, you'll have the confidence and experience to launch your future.

## Zoë Thorpe

she/her | Pittsburgh, PA | Class of 2024

Major: Economics and Statistics

**“When you’re coming into Carnegie Mellon, you’re expecting very challenging courses. But I’ve also gotten more value than I realized I was going to in terms of practical applications.”**

For Zoë, the amount of hands-on learning at Carnegie Mellon has been a welcome surprise. In one class, her project-based coursework included forecasting unemployment rates and nonfarm payroll. In her internships, she has applied her skills in statistics and data analysis in fields ranging from alumni engagement to insurance to actuarial consulting. A friend even enlisted her to join his case competition team, where she contributed her technical skills to the group’s research and final presentation.

# Our faculty members are thought leaders and people leaders.

Here at the Tepper School, our award-winning faculty lead The Intelligent Future by example. Cutting-edge researchers, innovative thinkers, and empathetic mentors — Tepper School faculty showcase impressive dynamism both in and out of the classroom.

Tackling complex problems requires thought leadership from many disciplines and perspectives. Tepper School faculty are engaged in research with Carnegie Mellon experts who are leading their fields in other disciplines, such as behavioral economics and artificial intelligence.

Our program is small by design. With the Tepper School's low student-to-faculty ratios, you will do more than just learn from industry experts. Your professors will know you, make themselves available for one-on-one discussions, and be invested in your personal success. With Tepper School faculty in your corner, you will unlock your full potential.

## Will Rifkin

he/him | Tuxedo, NY | Class of 2025  
Majors: Business Administration,  
Decision Science

“Professors are an integral part of the support systems offered to students at Tepper. My direct connections with them make me feel more confident to do the types of challenging coursework that Tepper offers.”

Building relationships with professors has been important to Will's experience. For him, those relationships can start with something simple and personal, like discovering a professor's shared love of running. When it comes to coursework, he knows that his professors are only an email — or even a text message — away. That's a level of care that distinguishes Tepper School faculty from other business schools.

# Find your place in The Intelligent Future.™

Your experience outside of the classroom is just as important as what happens inside of it.

College is about more than grades; it's about gaining confidence, exploring your interests, and building your network. Here at Carnegie Mellon, you'll find a close-knit and dynamic community of students, faculty, and academic advisors ready to help you make the most out of your undergraduate years.

The Tepper Quad is where it all begins. It's where you'll attend classes and events, meet with academic advisors, and engage on projects with students from other Carnegie Mellon schools

and colleges. Buzzing with activity and possibility, this will be the heart of your experience.

Beyond the Tepper Quad, you will meet students from all over the world in residence halls and dining centers, and by joining student clubs and activities. By the time you graduate, you will know scientists, artists, actors, environmentalists, mathematicians, and engineers.

**So much awaits you at Carnegie Mellon. Get ready to dive in.**

## Swartz Center for Entrepreneurship

Strategically located within the Tepper Quad, the Swartz Center for Entrepreneurship is a campus-wide center for innovation. Here, you'll encounter fellow dreamers and doers from across the Carnegie Mellon community and have an abundance of resources at your fingertips. Take advantage of courses, clubs, and experiential learning opportunities to build your understanding and skills. Then, leverage maker-spaces, mentorship programs, networking, and funding opportunities to bring your ideas to life.

## Priya Shah

she/her | New Hyde Park, NY | Class of 2024  
Major: Business Administration  
Minor: Decision Science

**“Carnegie Mellon is super interdisciplinary. I’ve met students in information systems, computer science, psychology, decision science, math, and engineering. It’s been nice to see people being super passionate about what they do and what they create here. It only makes you want to be better.”**

For Priya, getting involved with Carnegie Mellon’s vibrant campus life is a must for any student. She has met her closest friends through student organizations such as TEDx CMU, Women in Business, CMU Raasta, and Helix Dance Crew and — spoiler alert — they aren’t other business majors. An avid networker, she has found that her conversations with upperclass students and alumni have given her career clarity. Combining her love of people and interest in technology, she plans to pursue a career in tech sales.

## Daniel Levit

he/him | Morganville, NJ | Class of 2023  
Major: Business Administration | Minor: Global Systems and Management

**“As a member of the LGBTQIA+ community, I was not only accepted, but empowered. I want to bring social impact and activism into my career because it’s something that I’ve focused on as a student here at Tepper.”**

In his leadership positions on campus, Daniel has sought opportunities to create social impact. At every turn, he’s received support and encouragement from the Carnegie Mellon community. He created a mentorship program for LGBTQIA+ students, developed a DEI&B training for his business

fraternity, and serves as President of 180 Degrees Consulting to strategize innovative solutions for the social sector. Collaborating with peers, graduate students, and Carnegie Mellon alumni, he has transformed ideas into actions. That’s what we call the art of leadership.

# Bring your whole self with you to Carnegie Mellon.

Deepen the interests that defined your high school years or start fresh with something new.

From athletics to Greek life, and student government to academic clubs, you will have ample opportunities to explore your personal and professional interests on campus. Play an intramural sport, join an a cappella group, volunteer, or start an organization of your very own! You'll also find your own communities and affinity spaces represented within Carnegie Mellon's broad offering of diversity-related student organizations. Tepper School students are known

for being leaders both in and out of the classroom who take full advantage of their campus involvement to hone their leadership skills.

Along the way, you will form lasting bonds with students from diverse majors, backgrounds, and experiences. Collaborating with students from across campus, you'll broaden your perspective while adding your own voice into the mix. That's what being a Tepper School student is all about.

## Natalie Salazar

she/her | Houston, TX | Class of 2023

Major: Business Administration | Minor: Politics and Public Policy

**“Tepper has a place for everyone, regardless of background, regardless of identity, regardless of where they came from. That was huge for me.”**

As a first-generation college student, Natalie wasn't sure what to expect. But right from the start, she connected with peers who shared similar backgrounds and experiences. It wasn't long before she added upperclass students, academic advisors, and even campus administrators to her support network.

Being a Tepper School student has encouraged Natalie to explore her interests beyond the business school. She spent a semester in Washington, D.C., where she completed her minor in public policy and politics. A natural leader both in and out of the classroom, Natalie was the first Latina elected as Carnegie Mellon's student body president.

## Zachary Leventhal

he/him | Brookeville, MD | Class of 2023

Major: Economics and Mathematical Sciences

**“Being a Carnegie Mellon student gives you the ability to synthesize complex concepts with what you already know. I've had the chance to pursue top-level research internships, and I feel incredibly prepared for future graduate work in economics.”**

As an upperclass student, Zachary recognizes the advantages that Carnegie Mellon has given him. His strong statistical, mathematical, and programming coursework helped him land back-to-back internships at the Federal Reserve Board of Governors in Washington, D.C.

That's not all. As president of his fraternity, Alpha Epsilon Pi, Zachary has participated in Jewish life on campus, made close friends, and developed valuable leadership skills. After graduation, he will start work at MIT as a Pre-Doctoral Research Fellow in the field of health economics.

# Build your network from classroom to career.

From the moment you arrive on campus, you'll encounter the network you need to identify and reach your goals after graduation.

Take advantage of our career and professional resources to explore your career interests. Our students receive highly personalized guidance and support through on-campus resources, conversations with academic advisors, and more.

### Career and Professional Development Center

The Career and Professional Development Center is where it all begins. Take advantage of career exploration resources, meet with a Career Peer Mentor, build your resume or curriculum vitae, attend internship and career showcases, and more.

### Academic Advisors

From your coursework to your career, you'll meet regularly with your academic advisors to discuss a full range of topics. They'll keep you on track with your studies, learn about your professional and personal interests, and help you clarify your goals.

### Carnegie Mellon Upperclass Students

Tepper School students enthusiastically agree that older students are not only approachable; they're often your best resource for practical advice. They'll talk about their internship search, networking tips, and mentorship.

### Carnegie Mellon's Alumni Network

Carnegie Mellon's extensive alumni network is never more than an email — or a LinkedIn message — away. Always willing to answer questions, offer advice, and make introductions on your behalf, they'll give you a clear view of where they've been so you can decide where you're going.

## Tre Brassell

he/him | Gastonia, NC | Class of 2024  
Major: Business Administration | Minor: Societal and Human Impacts of Future Technologies

“My first year was a big adjustment from high school to college for me. My advisor worked with me to get a plan together and keep everything on track. Just knowing there were meetings on the calendar made me want to work harder.”

Like many students, Tre found the transition from high school to college to be challenging. But he never felt alone. His academic advisor put monthly meetings on the calendar to help him excel in his studies. Tre celebrated a big win in his coursework by successfully pitching an idea to investors in his Introduction to Entrepreneurship class. He’s excited to continue exploring both entrepreneurship and marketing during his Tepper School years.

# If this excites you, then you’ll fit right in.

**Take your place** alongside smart, hardworking classmates in an environment that will support you, challenge you, and prepare you for your future.

INTELLIGENT FUTURE.**

## Adrian Yao

he/him | Shanghai, China | Class of 2024  
Majors: Business Administration, Statistics and Machine Learning

“My first semester, I went to the CPDC (Career and Professional Development Center) and talked to Career Peer Mentors who had already been through classes and internships. They gave me actionable advice on what I can do with my degree and helped me focus on what I want to do after Carnegie Mellon.”

Adrian takes full advantage of the Tepper School’s career resources to explore his interests. Early on, he engaged with upperclass students at the CPDC to put together a strong resume. Motivated to explore various aspects of the financial field, he has

completed multiple internships and participated in the Tepper Finance Group and Scottie Ventures to gain hands-on experience with everything from the stock market to venture capitalism.
