Connecting a Musical Device

Note: If you would like to show a video from an iPod video player, see Connecting an iPod Video Player.

1. Bring a mini-to-mini cable to the classroom.

2. Connect one end of the cable to the headphone jack on the music player.

3. Connect the other end of cable to the **AUX VGA AUDIO** jack on the auxiliary input panel and then turn on the music device.

Continued on reverse.
4. Touch **Aux (Video) Inputs** and then **VGA - Sound from VGA**.

5. Operate the music device. Control the volume using the touch panel.
