Connecting a Musical Device

**Note:** If you would like to show a video from an iPod video player, see *Connecting an iPod Video Player.*

1. Bring a mini-to-mini cable to the classroom.

2. Connect one end of the cable to the headphone jack on the music player.

3. Connect the other end of cable to the **AUX VGA AUDIO** jack on the auxiliary input panel and then turn on the music device.

*Continued on reverse.*
4. Touch **Aux (Video) Inputs** and then **VGA**.

5. Operate the music device. Control the volume using the touch panel.
