Teaching Mode: Display Controls

NOTE: Display Control buttons are on/off toggles while Annotation Mode buttons are single selection buttons. Multiple Display Controls options can be selected and combined with Annotation Modes.

A highlighted blue button means the selection is enabled.
E.g. from the image below, Route Student Computers to Displays is enabled.

- displays lectern devices to only the main LCD display or to all LCD displays in the room
- displays a student computer to all or only specified LCD displays
- displays one lectern/one student computer OR two student computers as a side-by-side (split-screen) display on all screens with annotation tools
- displays a blank whiteboard with annotation tools to all of the room LCD displays
- displays a single display with annotation tools

Display Controls: Synchronize all Displays with Main Display

1. Touch a Lectern Device to Display.
2. Touch **Main Display Primary Source** or **Main Display Secondary Source** (under the **Main Display Source** banner).
3. Touch **Synchronize all Displays With Main Display**.

**OPTIONAL**: Use the **Main Display Secondary Source** to preview your device’s display prior to projecting on the **Main Display Secondary Source**.
Display Controls: Route Student Computers to Displays

1. Touch **Route Student Computers to Displays**.

2. Touch a student seat number from the map.
   **NOTE:** Each computer/LCD display is labeled and corresponds with the map.

3. Touch an area to display the device:
   a. Display on the primary LCD display
   b. Display on any individual LCD display in the room
   c. Display using Synchronize all Displays With Main Display to project the same image to all LCD displays.
Display Controls: Combined Image to All Displays (Split-Screen)

1. Select one of the following:
   a. Touch a Lectern Device to Display — OR —
   b. Touch Route Student Computers to Displays and select a seat number.
2. Touch Main Display Primary Source for the 1st device
3. Repeat step 1 for the 2nd device.
4. Touch Main Display Secondary Source for the 2nd device.
5. Touch Combined Image to all Displays. A split-screen of the 1st and 2nd devices appears on all LCD displays.
Display Controls: White Board to All Displays or Single Display

**NOTE:** For White Board to all Displays, select **White Board to All Displays**. No further action is necessary.

1. Touch a **Lectern Device to Display**.
2. Touch **Main Display Primary Source** under the **Main Display Source** banner.
3. Touch **Synchronize all Displays with Main Display** under **Display Controls**.
4. Touch **Single Display** and touch **Main Display Primary Source** (under the **Main Display Source** banner).
5. Use the **Annotation Menu Bar** to make your desired annotations on your display.
