Windows: Connect to a Wireless Network

Follow these steps to connect to a wireless network:

1. If applicable, check to be sure that the physical Wi-Fi switch on your laptop is set to ON.
2. Click on the Wireless Network icon. It is located in your system tray (typically in the lower right corner of your screen display).
   **Note:** If you do not see the wireless icon, click the up arrow to reveal any hidden icons.
3. In the list of available networks, select the network that you want to connect to. A Connect button appears.
4. Click Connect.
5. If the network that you chose is secure, you’ll need to enter a password to connect. The password is supplied by the network provider. For example, if you are connecting to the hotel network, the hotel will provide you with the password.

Mac: Connect to a Wireless Network

Follow these steps to connect to a wireless network:

1. Click the WiFi icon (top right of your screen display).
   A list of available wireless networks appears.
2. Select the network that you wish to connect to.
3. If the network that you chose is secure, you’ll need to enter a password to connect. The password is supplied by the network provider. For example, if you are connecting to the hotel network, the hotel will provide you with the password.

Networks

The following is a list of networks that are commonly accessed by Carnegie Mellon affiliates:

Carnegie Mellon Pittsburgh Campus
- Select CMU-SECURE network
- Enter your Andrew userID and password

Pittsburgh International Airport
- Select FLYPITTSBURGH
- Establish a secure VPN connection

Dulles International Airport
- Select Dulles Airport
- Establish a secure VPN connection

Qatar Airport
- Select Dia Network

**Note:** Once connected to any of these networks, you may need to open a web browser (e.g., Internet Explorer, Firefox) and follow steps to accept the terms and conditions. If the terms and conditions do not appear, refresh your browser by visiting another website (e.g., www.cnn.com).
