Display Desktop Computer

- Press the power button located on the control panel at the lower left-hand edge of the screen.
- The desktop computer will display by default.

Display Laptop

- Connect the HDMI cable to your device.
- Press INPUT on the control panel and select HDMI1 using the < ch > (Channell) buttons. Return the setting to PC IN when finished.

Tips

- Log in to the desktop PC using your Andrew UserID.
- To enable display mirroring (instead of extended desktop), go to System Preferences>Displays>Arrangement. Check Mirror Displays.
