Display Desktop Computer

- Wake the Mac.
- Locate the remote and press **POWER** to turn on the display, if necessary.
- If the Mac does not display by default, press **INPUT** on the remote and select *Computer* (input 6) from the on screen menu.

Display Laptop/Mobile Device

- Connect the HDMI cable or VGA and Audio cables to your device.
- Press **INPUT** on the remote and select *LAPTOP* (Input 4) to use the VGA and audio cables.

Tips

- Log in to the desktop Mac using your Andrew UserID.
- The Mac displays in extended desktop mode by default. To enable mirroring, go to the *System Preferences>* Displays>* Arrangement and check *Mirror Displays*.
