"The Global Studies major gave me the flexibility to enrich and tailor my CMU experience. I studied abroad, led a student organization, and actively participated in student life. My coursework also taught me to think critically and analytically. Now that I'm in the workplace, I really see the value of my degree. One’s ability to think critically has to be nurtured over time and cannot be taught through on-the-job training. This skill is also a foundation for becoming a leader."

74% of Global Studies graduates have confirmed employment or graduate school plans at the time of commencement (2015-2017).

Where do GLOBAL STUDIES graduates work?

BUSINESS
- General Electric
- Google
- National Oilwell Varco
- PNC
- UBS International
