Pending

7578055	Schwartz (PI)	09/01/2015—8/31/2020
NSF		Total Costs: \$2,992,114
Title: <i>NRT-DESE: Program in Biological Data Sciences (PBDS)</i>		

The proposed program will create a new graduate training program, the Program in Biological Data Sciences, that will train a cohort of students from across an interdisciplinary spectrum in the theory and practice of team-based, data-driven life sciences research.

Role: Co-PI

Current

R01 DA196759 Shadel (PI) 09/23/2015—08/31/2019

NIDA Total Costs: \$1,669,100

Title: *Testing the impact of tobacco product graphic warning labels at retail point-of-sale*

The goal of this study is to test the effects of graphic warning labels on tobacco use risk in young adults and to examine mediators (e.g., affective reactions as assessed by the Facial Action Coding System) and moderators (e.g., gender, age, SES) of this increased risk.

Role: Co-I

L30 AA022509-02 Creswell (PI) 07/01/2015—06/30/2016

NIAAA/NIDA Total Costs: \$18,426

Title: *Mechanisms of addiction: Examining psychological, genetic, and contextual risk factors for substance use disorders.*

The goal of this NIH Loan Repayment project is to better understand risk factors for the development of substance use disorders in young adulthood through the use of secondary analyses of a longitudinal high-risk sample.

Role: PI

Title: *Genetic links to the reinforcing effects of alcohol in a social context.*

Ruth L. Kirschstein National Research Service Award (NRSA) Predoctoral Fellowship

This study used measures of multiple response systems to examine the impact of alcohol on social bonding during an initial group interaction. The primary goal was to determine if persons with polymorphic variation in genes associated with increased risk for alcohol use disorder are more sensitive to alcohol's rewarding effects in a social setting.
