Many graduate students are considering financing their education with either Federal Graduate PLUS Loans or private student loans. The comparison chart below will help you understand the features and benefits of each type of loan.

Interest rates and fees for private loans vary from lender to lender based on the credit of the individual borrower and cosigner. We recommend that you research private loans before deciding which type of loan is best for you. Remember, applying for a private student loan does not obligate you to accept it and typically shopping for a loan has minimal impact on your credit score.
