First QoLT Textbook - Now Available!

Released October 2012

CRC Press, Taylor & Francis Books, Inc.
Rehabilitation Science in Practice Series
ISBN-10: 1466505346

“defines and establishes a framework for a new interdisciplinary science”

“sets a conceptual foundation for QoLTs”

“A comprehensive resource on the process of developing, testing, and commercializing advanced technologies that improve the quality of life and functioning of older persons and persons with disability.”

“defines and establishes a framework for a new interdisciplinary science”
Contents:

I. Introduction and Conceptual Foundations
Chapter 1: Introduction and Overview: What do We Mean by Quality of Life Technologies?
Chapter 2: Who Can Benefit from Quality of Life Technology?
Chapter 3: Facilitators and Barriers to Technology Uptake: Individual End-user Perspectives
Chapter 4: Facilitators and Barriers to Technology Uptake: Organizational and Societal Perspectives

II. Design, Development, and Evaluation
Chapter 5: Assessing Needs, Preferences, and Attitudes Using Survey Methods
Chapter 6: Design and Development Process
Chapter 7: Universal Design for QoLTs
Chapter 8: Fostering Teamwork and Community Partnerships
Chapter 9: Evaluating Quality of Life Technologies

III. Core Technologies and their Application
Chapter 10: Vision Based Sensing Approaches to QoLT
Chapter 11: HERB: A Personal Assistive Mobile Manipulator in the Home
Chapter 12: Architecture and Applications of Virtual Coaches
Chapter 13: Non-wearable In-home Sensing for Early Detection of Health Changes
Chapter 14: Quality of Life Technologies in Supporting Caregivers

IV. Transforming Education and the Market Place
Chapter 15: Developing Future Generations of QoLT Researchers through Education, Outreach, and Diversity Initiatives
Chapter 16: Innovation, Commercialization and Start-ups
