

QoLT Industry Panel

Learn about exciting careers in Healthcare and Quality of Life Technology

Date: Friday, May 22, 2009

Time: 4:30-5:00 PM Panel Introduction
5:00-5:30 PM Open Discussion
5:30-6:30 PM Networking Hour

Location: Rangos Hall, University Center, CMU

Directions found at:

<http://www.cmu.edu/university-center/directions/index.html>

Website:

<http://www.qolt.org>

**We welcome faculty,
students, and anyone
interested to attend!**

Refreshments will be served.

**For more information, please contact
Shivayogi Hiremath at 412-638-0020**

Speakers:

Jonny Farrington

Director of Research, Bodymedia Inc.

BodyMedia is a world leader in the design and development of wearable body monitoring products and services. Bodymedia's innovative products and patented technologies provide accurate and actionable information about the health and behaviors of people outside of the traditional clinical setting. BodyMedia is creating state-of-the-art solutions that make it easy for patients and practitioners to track a person's total energy expenditure, duration of physical activity, nutrition, and sleep.

John G. Bertoty

Executive Director, Blueroof Technologies, Inc.

Blueroof aims to develop state-of-the-art living facilities that will keep senior citizens safer, healthier, and living independently at home as long as possible. Blueroof's Senior Smart Technology focuses on Information Technology, sensors, and computer hardware and software to monitor and optimize the lives of senior citizens, thereby avoiding or postponing institutional care by providing a safe home environment.

Amar Kapadia

Director, Innovation & New Ventures, Vocollect, Inc.

Vocollect and its worldwide network of certified supply chain resellers and channel partners deliver proven gains in productivity, accuracy, safety and job satisfaction. Every day hundreds of thousands of people on six continents use the integrated Vocollect Voice® portfolio of voice applications to improve work. Vocollect Voice® literally talks people through their daily tasks, replacing cumbersome lists and traditional data capture methods with hands-free, personal voice dialogs.

Brian Long

**Innovation Manager, New Business Creative Center,
Bayer MaterialScience**

Bayer MaterialScience AG is an independent, globally operating company within the Bayer Group. Bayer MaterialScience AG is one of the world's largest producers of polymers and high-performance plastics. Its innovative developments in coatings, adhesives, insulating materials and sealants, polycarbonates and polyurethanes significantly enhance the quality of our lives.

Louis Ross

President, CEO & Chairman, Virtus Advanced Sensors

Virtus Advanced Sensors is a fabless sensor company commercializing inertial sensor technology developed using MEMS (Micro Electro-Mechanical Systems) and micro-machining methods. Along with its ability to create and enhance core technology for its sensor products, Virtus is also a leading applications and end-user product developer. The company maintains a large global patent portfolio of MEMS inertial sensor and related technology, which includes multi-axis accelerometers and gyros and integrated motion sensors.
