

Disaster Management Initiative

Breakout Goals and Process

Steven R. Ray, Ph.D.

Distinguished Research Fellow

Carnegie Mellon University

Primary Goals for the Breakouts

1. Define some actionable, propose-able project ideas
2. Identify synergies between the many aspects of disaster management

Five Breakout Groups

1. Device and Application Technologies
2. Wireless Communications
3. Common Operating Picture and Emergency Operation Centers
4. Collaboration Environments for Emergency Response and Solution Development
5. Citizen Response and Social Networking

Six Key Questions

1. What are opportunities to leverage new technologies and approaches in your area?
2. What are the technical and organizational challenges?
3. What are the top 3 short term synergistic activities we should commit to do, and how to proceed?
4. Where can we find the needed money to address these activities?
5. What are the Interoperability and System Integration implications and issues?
6. Optional: Sketch the longer term roadmap of proposed actions and research

Breakout Process

- Facilitator, Scribe, and Rapporteur for each group
- Only one hour, so try to be efficient
- 5 minute summary at 3:45, with a little time for transitions & questions

Have Fun!

See you at 3:45
