**Inspiration**
- Motivate persons to exercise
- Reduce carbon footprint

**Approach**
- Use phones GPS to automatically detect type of activity.
- Provide Scores based on activity
- Track previous scores to view daily progress and motivate users
- Provide Instantaneous feedback
- Share results with peers to motivate users.

**Solution**
- Start Activity
- Provide Instantaneous feedback
- Share scores
- Track Progress

**Architecture**
- SQL Lite DB
- Feedback
- Android. Location
- Reporting
- Android. Graphics
- Sharing
- Android. Telephony

**Product Roadmap**
- Share scores on social networks – Facebook, Twitter
- Compare results with peer groups
- Include more activities - Hiking, CarPool, Train, Bus
- Enhance User interface
