

CARNEGIE MELLON UNIVERSITY BME 2022 SPRING SEMINAR SERIES

Digital Therapeutics and Chronic Disease Management: A Case Study in Diabetes

PRESENTED BY

Anand Iyer
Chief Strategy Officer
WellDoc

SCHEDULE

Thursday,
February 17, 2022
(10:15AM-11:15AM)

With exponential increases in both the costs and incidences of chronic diseases such as diabetes, traditional healthcare remains challenged in its ability to meet the outcomes, satisfaction and quality goals associated with delivering care. Technology and an emerging concept known as digital therapeutics are transforming the way chronic diseases are managed. This seminar takes a closer look at digital therapeutics and how they are bending the outcomes and cost curves in diabetes management.
