Onboarding Information & Checklist for U.S. Faculty and Staff

Welcome to Carnegie Mellon University! This document is for new and re-hires. This document contains information and a list of steps that need to be completed to get started here at CMU. The majority of these steps will be completed in Workday, CMU’s unified, global, Human Resources, Payroll, Benefits and Time Tracking system. Please contact the CMUWorks Service Center with any onboarding questions.

Steps for Setting up your Andrew Account

Note if you already have an Andrew account and are actively using it, you may continue to do so. **No further action is required.**

**Step 1: Complete the prior affiliation questionnaire.** This questionnaire is used to identify whether or not you have had a previous relationship with the University. Please complete this brief survey using the following URL: [https://www.surveymonkey.com/s/priorcmu](https://www.surveymonkey.com/s/priorcmu).

**Step 2: Retrieve your Andrew account.** You will receive an email from Computing Services within 72 hours after you complete the prior affiliation questionnaire. The email will contain a link to a website where you will retrieve your Andrew account information. Please make note of your Andrew account as you will not be able to access this website again.

**Step 3: Set your Andrew account password.** Now that you have retrieved your Andrew ID, you will receive another email that will provide instructions for setting your password.

**Step 4: Register for Duo, the University’s two-factor authentication (2fa) system.** Once your Andrew account password has been set, you will be directed to enroll in two-factor authentication. Two-factor authentication is required for all faculty and staff within the University. It will help keep your Andrew account and the data you have access to secure.

Getting Started With Workday Prior to Your First Day

Your Andrew account is your gateway to the computing environment at Carnegie Mellon University. This account gives access to email, university systems, public computer labs and other resources.
