

WELCOME TO CO-BOX!

Co-Box is a special activity box that will help you to design a new video game with researchers and designers from Carnegie Mellon. The video game we are creating together is being designed for kids just like you. We'd like you to help us design it because you know best the games that you enjoy playing! Your answers to each of these activities will help us with big ideas and little ones, from how the game looks, to the story it tells, even to the characters you'd like to see!

HOW DOES IT WORK?

Each box we send you will have game design activities that allow you to work with the game designers at Carnegie Mellon University. When you're done with an activity, you can upload your work using your special Designer ID Code on our app at: **cobox.me**. This app works on a cellphone, so you can upload everything you need!

WHAT'S A CO-BOT?

Our first co-box asks about **co-bots**. Co-bots are robots that are designed to work closely with humans. That means that the robot has to share space with humans and work together. Our game will contain a co-bot and we want your opinions about what a cool way to work with these new robots might be. We can't wait to see what you dream up!

READY TO GET STARTED?

Turn this card over to get your special **Designer ID Code!**

YOUR SPECIAL DESIGNER ID CODE

LET'S GET STARTED!

Many co-box activities will ask you to take a picture or record your voice. Let's try it out!

1. Go to cobox.me using a computer, tablet, or cellphone.
2. Type in your Special Designer ID that's in the purple box. **Save this card** and **don't lose your ID**. You'll need it to log into the app!
3. Click on the Practice Activity.
4. Follow the directions to upload pictures () and audio ().

Once you're done with the practice activity, you can move on to activity #1!

If you have any trouble, just send an email to:

P3G-project@lists.andrew.cmu.edu

We're happy to help!
