USE HYBRID TEACHING TECHNOLOGY

1. Connect the **USB cable** to your laptop to use the conference camera and microphone.
2. Start a **Zoom** meeting on your computer.
3. Use the **Zoom app** to:
 - change the audio and video settings for the conference camera and microphone.
 - share your screen.

NOTE: For additional information on using Hybrid Teaching Technology, visit cmu.edu/computing/start/teaching/standard-hybrid.html

The screenshot shows a control panel for a presentation system. It is divided into three main sections: DEVICE, CONTROLS, and ACTIONS. The DEVICE section on the left lists options: Laptop, Doc Cam, Blu-ray Player, and Wireless Presentation. The CONTROLS section in the middle is further divided into Display Controls (with buttons for Turn Off, Blank Screen, Screen Up, and Screen Down) and Device Controls (with a warning icon and text: "Select a device on the left to start the system. Controls for selected device"). The ACTIONS section on the right is currently empty. At the bottom, there are controls for Lights, a volume slider with "Adjust volume" text, and Advanced Audio. Three numbered callouts are present: 1. "Tap to start" points to the top right corner of the panel. 2. "Select device" points to the "Doc Cam" option in the DEVICE list. 3. "Set display" points to the "Display Controls" header in the CONTROLS section.
