# Economics & Statistics (BS)

**Major** Faculty Advisors: Rebecca Nugent and Edward Kennedy; Academic Advisor: Samantha Nielsen (BH 132A)

Website: [http://www.stat.cmu.edu/](http://www.stat.cmu.edu/)

The major in Economics and Statistics provides an interdisciplinary course of study aimed at students with a strong interest in the empirical analysis of economic data. Jointly administered by the Department of Statistics and the Undergraduate Economics Program, the major's curriculum provides students with a solid foundation in the theories and methods of both fields. Students in this major are trained to advance the understanding of economic issues through the analysis, synthesis and reporting of data using the advanced empirical research methods of statistics and econometrics. Graduates are well positioned for admission to competitive graduate programs, including those in statistics, economics and management, as well as for employment in positions requiring strong analytic and conceptual skills - especially those in economics, finance, education, and public policy.

Because this curriculum is highly sequenced, it is important to plan out each semester's courses with your advisor.

This is a suggested schedule for a Primary Major. The remainder of the Major and GenEd can be completed in the junior and senior year.
