

“A World of Change in 30 Seconds”

Artist’s Statement

This video was created for Dr. Candace Skibba’s course 82-281: Pandemic Perspectives Re-Viewing Through a Cultural Lens. For the final project in the class we were assigned to share the information and ways of thinking that we had considered throughout the course. We were given liberty as to the means of doing so and could choose a more creative or structured way of presenting our ideas.

The last few years have eluded us all. How much time actually passed? What happened in 2020? On the one hand it seems like so much and on the other, maybe nothing happened. I asked my friends and family to take up the daunting task of explaining their Covid-19 experience in 30 seconds or less and then, I tried to recreate their experience with the only thing that kept me afloat during the pandemic, circus.
