

ECONOMICS

The Undergraduate Economics Program is a collaboration of the Tepper School of Business and Dietrich College. Additionally, the Dietrich College's Department of Social and Decision Sciences offers the first-of-its-kind major in behavioral economics, policy and organizations.

Undergraduate Economics Program

- B.A. in Economics
- B.S. in Economics
- B.S. in Economics and Mathematical Sciences
- B.S. in Economics and Politics
- B.S. in Economics and Statistics

B.A. in Behavioral Economics, Policy and Organizations (BEPO)

Minors

- Economics
(Also an Additional Major)

Example Student Research Projects

- Connecting Monetary Policies with Exchange Rate in the Euro Crisis
- Consumer Behavior
- Economic Inequalities of Minor League Baseball
- Leadership Styles in Group Work

Career Opportunities

- Graduates pursue careers as analysts and economists in banking, consulting, government, informatics, marketing and technology.
- Behavioral economics students have worked in industry sectors from finance and human resources to entertainment, marketing and technology as well as in government and public policy positions.
- Students also go to graduate school to study business administration, economics, finance, informatics, medicine and statistics.

Fun Facts!

- The Tepper School of Business counts nine Nobel Laureates among its former students and faculty.
- Dietrich College Professor George Loewenstein is a co-founder of the behavioral economics field.
