

Release #110 continued the improvements to the Persistence Management screens, which are used by some users to review students who are separated from the university and expected to return in a future semester. This release also included changes in SIO that will allow students to receive prompts to update their required contact information as often as each semester, instead of only each fall semester.

New users are encouraged to review the [S3 QuickStart Guide](#) and the [Web Tutorial](#) section for basic instructions.

Release Highlights

Cross-Cutting

- Introduced the option for the Required Info Prompt to occur prior to the start of every semester, if desired
- Continued improvements for ADA compliance in some screens in SIO
- Continued improvements on the Persistence Management screen used by some users to track students on a leave so as to assist those students with making their return as smooth as possible

Admission

- Updated text in admission letters
- In the WhereAml (WAI) application, implemented new technology to mitigate errors that occur external to the application

Coming in the Next Six Months...

- Continued additions and changes in the S3 Suite to support the university's response to COVID-19
- A complete revision of the "My Info" section in SIO that both modernizes and refreshes the look and feel
- The next phase of the MyCommunity project continues, which includes:
 - A wider range of advisor roles will be able to be assigned to students, such as First Year Advisor and Faculty Advisor
 - The ability for S3 users to assign, update, and remove advisors via a CSV upload
