

Release 156 completed the transition of affiliations to the student's Profile:Miscellaneous screen (moved from the Summary screen).

New users are encouraged to review the [S3 QuickStart Guide](#) and the [Web Tutorial](#) section for basic instructions.

Release Highlights

Cross Cutting

- Completed the transition of affiliations to the student's Profile:Miscellaneous screen (moved from the Summary screen)
- Introduced message banners that display across the top of S3, SIO, or MPS; to be used by Enrollment Management staff as a way to share time-sensitive system-related information with users without sending mass emails
- Resolved an issue encountered in the layout of the mobile version of SIO on certain screens
- Continued improvements to ensure special characters in name and address fields are stored and processed correctly in the S3 Suite

Registrar

- Increased the flexibility of authorization options for advisors to be able to change a student's grade option on a course
- Expanded the data being captured when course reservations are updated, for improved trouble-shooting and user support
