

Release 168 updated the look and feel of My Plaid Student (MPS). It also introduced a new workflow in Student Information Online (SIO) and S3 that has been developed to support the Course Time Conflict (CTC) process.

New users are encouraged to review the [S3 QuickStart Guide](#) and the [Web Tutorial](#) section for basic instructions.

Release Highlights

Cross-Cutting

- Updated the look and feel of My Plaid Student (MPS)
 - Enhanced the application with a modern design that is user friendly, accessible, visually pleasing, and mobile friendly
 - Added easier navigation of functionality
 - Streamlined and modernized the underlying technology

Registrar

- As part of the Registrar Innovation Project, a new workflow has been developed for Student Information Online (SIO) and S3 to support the Course Time Conflict (CTC) process.
 - The goal of this work is to provide consistency and transparency, as well as leverage technology to support student, advisor, and instructor use of the new process.
 - More information can be found at <https://www.cmu.edu/hub/registrar/registration/index.html#conflict>
- Improved functionality for cross-listed courses when assigning classrooms and registering students to prevent the cross-listed sections' total enrollment from exceeding a classroom's capacity
- Improved waitlist reservation assignments, to ensure all students on a waitlist that match a section's reservations are assigned to that reservation
