

Release 173 resolved an issue affecting PC users who viewed or edited S3 student memos in Firefox. It also removed screens that have been unused since the Undergraduate Admissions transition from S3 to Slate as part of routine system cleanup.

New users are encouraged to review the [S3 QuickStart Guide](#) and the [Web Tutorial](#) section for basic instructions.

Release Highlights

Cross-Cutting

- Resolved an issue for students when an account being used for payments in Student Information Online (SIO) is deleted by a My Plaid Student (MPS) user
- Introduced a new targeted messaging feature in SIO, allowing important communications to be displayed to specific student populations

Admission

- Removed legacy screens that have been unused since the Undergraduate Admissions transition from S3 to Slate as part of routine system cleanup

Registrar

- Resolved an issue that occurred when users attempted to remove a Third Advisor for a student who was not degree-seeking when utilizing the Upload Advisor Assignments screen
- Resolved an issue affecting PC users who viewed or edited S3 student memos in Firefox
- Improved the degree deletion process by removing validation against lower-numbered degrees that had already been certified
