

Release #35 introduced new functionality for the Office of Undergraduate Admission and faculty users. New users are encouraged to reference the [S3 QuickStart Guide](#) and the [Web Tutorial](#) section for basic “how to” instructions.

Release Highlights

- Admission
 - Decision Letters Display Control: Allows an Admission user to monitor and control when applicants are able to view admission decision letters on *Where Am I in the Process*
 - Case Folder Management: Used for assigning applicant folders to admission readers

- Faculty Information
 - Faculty can now easily download CSV roster information for all of their course sections
 - Improved S3 logout behavior for faculty users

Additional changes:

- ✓ Updated ERP password login page in S3 and SIO Admin Console

Related Functionality Not Yet Released

- S3 Services/Batch Conversions: Accounting, authentication, potential college honors, QPA update, financial aid award letters, billing and aging, etc.

Coming in the Next Six Months...

- Conversion of remaining screens and batch processes to meet Cutover deadline of June 2015
- Limited S3 suite screen enhancements
