

Academic Audit Application Updates

April 2018

New Features

- Support redirection after Shibboleth (Single Sign On) login
- Update template applied to student
- Show "Recommended" tags on slots added through templates
- Prioritize/Force courses
- Enhanced keyboard accessibility for multiple views in new interface
- Disable and Hide students when they are no longer in the import file
- Sort students by:
- Engagement score
- Level
- Filter students by
- Audit
- Department
- Primary Advisor
- Grade in taken course
- Search courses by
- department
- Prioritize substituted (exception) courses when computing units completed for the requirement
- Prioritize exception courses over placeholders
- Allow hiding GPA and progress bar from advisee search
- Audit criteria now supports departments
- Allow adding Free Elective from elective dropdown in planner
- Allow template creation for programs with concentrations
- Allow multiple courses as substitutions (exception)
- Show school and department on staff search
- Show grades in transfer courses in planner

Fixed Issues

- Expand constraints on a requirement that has no sub-requirements when clicked
- Back button on semester view to go to student's plan
- X with Grades constraint wasn't working with specific grade (instead of a range)
- Planned courses now count for requirements with "ungraded" constraint.
- Don't remove co-req courses from past semesters
- Ungraded courses enabled for constraint that requires each course to be X units or more.
- For notifications, redirect to appropriate tab when clicking on feedback or notes notifications
- "Without planned" pdf printing bug fix
- Fix ordering of programs on advisee profile
- Co-req missing flag was incorrectly enabled if co-req was satisfied in an earlier semester (not in the same semester)

CMU Specific

- Support for student defined departments/programs
- Add concept of primary major so that audit is evaluated in the correct order
- Allow account creation from Google Sheet
- Hide down trend arrow for gpa from student's view
- Add Africa campus
- Add concentrations for given programs
