

Academic Audit Application Updates

February 2018

New Features

- [Stellic 1.0]: Completely fresh interface for the application. We've used all the last 2-years' input to redesign Stellic and make it even more interactive and user-friendly!
- [Analytics]: Course demand grid:
- [Integration] Support multiple courses taken in the same semester based on units
- [Testing] Double counting validation before publishing.
- [Audit against Course in a Plan]: Major audit revamp to allow courses with the same code taken multiple times to be used to satisfy multiple requirements
- [Feature] Exceptions for specific audits
- [Constraint] Take X courses that do NOT match the following courseset...
- [Constraint] Support for ungraded courses in repeatx. Ungraded courses can now be repeated.

Fixed Issues

- [UI] Program ordering is now Major, Additional Major, Minor
- [Audit] Courses were not double counting where they could.
- [UMS] Assign missing permissions for students that fall under new student sets
- [Integration] Delete past planned (unregistered) courses when we move to new semester
- [Audit] Draft audits publishing bug fix
- [GPA] Showing incorrect semester for GPA search
- [Audit] Audit changes to maximize count eligible unmatched courses
- [Advisee Search] Missing Student tab when student permissions were given only through Groups
- Template units consistency in all views
- {Object} in pdf bug fix
- All/Any constraints switching bug fix

CMU Specific

- Department to Student Permissions now resolves to any student taking a program under that department
- Separate Qatar and Pittsburgh departments and programs
- Download CSV in Firefox issue
- Course requirements getting deleted bug fix
- Compile and share error report
- Change x to 0 for requirement categories where it wasn't needed
- Delete programs not in feeder files
- Show unmatched
- Load Testing Report for 6000 users
