

Academic Audit Application Updates

June 2019

New Features

- Deleting audits and templates
- Notifications
 - Students can see notifications for actions taken on their plan
 - Students can control settings for how and how often they are notified
 - Advisors can control how and when they receive notifications
- University requirements with the same scope
- Concentration updates
 - Options will now show in-line with audit
 - Better readability
 - Only concentration student has registered for will be auto-expanded
- Search for students by entry year
- Can use 'units total' constraint with a 'repeatable' constraint
- Ungraded courses can now count for a requirement with the "ungraded allowed" constraint
- Audits prioritize courses that are added by exception over optimizing double counting
- Optimized orders of constraints

Fixed Issues

- Sped up platform
- Courses with decimal units now count correctly for the units requirement
