

## Academic Audit Application Updates

May 2018

### New Features

- Search advisees
- New Audit Constraints
- Review Plan
- Audit Cache
- Note Visibility for Groups
- View Course as a Student
- Distinguish between registered and planned courses in audit view and audit pdf report
- Search shared Requirements under programs tab through the scope
- First login in plan activity history

### Fixed Issues

- When substituting multiple courses, it now shows course status and icon for all courses.
- Audit publishing warning message previously showed null for certain requirements
- Users with only audit-view permission on an audit can now test audit on a student
- Planned courses were being included in audit pdf when checkbox for planned courses was not selected
- Show template name under templates tab on the program page
- Support satisfying repeat-course-x constraint using placeholders.
- Ask for confirmation when an exception is being removed
