Instructions for adding the “undergraduate prehealth” audit to Stellic:

1. Login into [Stellic](#)
2. Click “Programs” in the menu
3. Under **Filters** click “Type”
4. Scroll down and select “non-degree”
5. Select “Undergraduate Pre-health”
6. Last, make sure to ADD to your audit

When viewing your official audit, scroll down and you should see the Undergraduate Pre-health audit that outlines pre-req courses for pre-med and pre-dental schools. To the right, you should also see your PQPA (science GPA) that is calculated using all Bio, Chem, O-chem, Physics, math and stats courses (BCPM).

- Medical schools calculate the BCPM as your science GPA
- Dental schools calculate both BCPM and BCP
