

Fixed Term Dashboard

Audience: HR Generalists – ALG Members – Department Administrators

Introduction

Monitoring current fixed term appointments for employees is an essential element of the effort to implement clear and consistent processes to ensure equitable and compliant treatment of all fixed term employees as they join, separate and/or rejoin the university over time. The fixed term process will:

- Ensure that all fixed term employees will be automatically separated at the end of their assignment if the assignment hasn't been formally extended or renewed. If a new (future dated) offer letter is in Workday prior to the current end date, the employee will immediately be rehired. Andrew account access will not be removed.
- Ensure compliance with legal and plan document requirements and support equal treatment of fixed term employees across the university.

This guide will provide an overview of the data available to those with access to the fixed term dashboard and the responsibilities of those involved in the process. The Department Data View role will be assigned to individuals within departments who have responsibility for monitoring fixed term positions and the ALG dashboard will be updated to provide fixed term position and general staffing visibility.
