Countering disinformation May 27 – June 2

- ❑ The most popular tweet this week spread disinformation quoting the Pfizer CEO Bourla's WEF announcement: "Holy Crap! Can you believe Pfizer CEO Says it's their dream to Reduce the Population by 50 percent in 2023. <https://t.co/600ukpkAs5>;"
- ❑ The video, viewed tens of thousands of times, is nothing more than a deceptive edit of Pfizer's announcement of a program that aims to help poor people afford medications;
- ❑ Here is a Poynter factchecking piece that debunks this disinformation claim <https://www.poynter.org/fact-checking/2022/pfizer-ceo-albert-bourla-video-reduce-population-50-percent-fact-check/> "A video of Pfizer's CEO was deceptively edited to make a false claim about population reduction;"
- ❑ Another disinformation theory that was recently circulated stated that COVID-19 vaccines caused monkeypox;
- ❑ Several factchecking stories published in the media could be used to debunk this disinformation: <https://www.reuters.com/article/factcheck-health-monkeypox-idUSL2N2XG0W1>; <https://factcheck.afp.com/doc.afp.com.32B674W>; <https://apnews.com/article/Fact-Check-Monkeypox-AstraZeneca-Vaccine-139032138448>
- ❑ It is necessary to ensure that fact-checking links are widely shared. The suggestion is to promote them via social media communication; also, through partnerships with local organizations and communities who would share this information or similar fact-checking details from journalists and researchers in the media.
