1

PA Vaccine Conversations Project

- ❑ This report is an effort to summarize social media conversations around COVID-19 issues in Pennsylvania, with a focus on vaccination. It contains an analysis of the general topics related to COVID-19 vaccination. This includes discussions related to COVID-19 regulations, mandates, masks, pro-and anti-vaccination campaigns, science messages, misinformation, disinformation, conspiracy theories, and vaccine hesitancy messages.
- ❑ Anti-Vax messaging includes vaccine hesitancy messages, opinions, questions, policy health and science related information, misinformation, disinformation, and conspiracy theories.

Countering disinformation August 19 – August 25

- ❑ Articles and fact-checking stories debunking disinformation for the last week:
- ❑ Posts mislead about advantages of natural immunity to Covid, 'dangers' of vaccination
<https://factcheck.afp.com/doc.afp.com.32GP6GU>
- ❑ COVID-19 Vaccination Doesn't Increase Miscarriage Risk, Contrary to Naomi Wolf's Spurious Stat
<https://www.factcheck.org/2022/08/scicheck-covid-19-vaccination-doesnt-increase-miscarriage-risk-contrary-to-naomi-wolfs-spurious-stat/>; Fact Check: Miscarriage Rate NOT 44% For Pregnant Women in Pfizer COVID Vaccine Trial <https://leadstories.com/hoax-alert/2022/08/fact-check-miscarriage-rate-not-44-percent-for-women-in-pfizer-covid-vaccine-trial.html>; Fact Check: A confidential Pfizer document reveals that 82-97 percent of pregnant women who received the company's COVID-19 vaccine "lost their babies."
<https://theparadise.ng/fact-check-a-confidential-pfizer-document-reveals-that-82-97-percent-of-pregnant-women-who-received-the-companys-covid-19-vaccine-lost-their-babies/>
- ❑ Correcting Misinformation About Dr. Fauci <https://www.factcheck.org/2022/08/correcting-misinformation-about-dr-fauci/>; Almost everything Tucker Carlson said about Anthony Fauci this week was misleading or false
<https://www.science.org/content/article/almost-everything-tucker-carlson-said-about-anthony-fauci-week-was-misleading-or-false>
- ❑ Widespread Claims Misrepresent Effectiveness of COVID-19 Vaccines
<https://www.factcheck.org/2022/08/scicheck-widespread-claims-misrepresent-effectiveness-of-covid-19-vaccines/>

8/31/2022

Measures for countering health disinformation

- ❑ Anti-vaccine narratives are still pervasive on social media, while there are not that many counter-narratives about the positive effects of vaccines;
- ❑ There is a need for a reframing of social media as a medically and socially valuable resource and platform because of its high impact on society;
- ❑ Healthcare organizations need to implement social media strategies to create and expand conversations countering disinformation on social media;
- ❑ It would be helpful for health communicators to cooperate with local influencers who could spread pro-vaccination messages. Another strategy could be to motivate health practitioners to use social media as a channel for communication with the public;
- ❑ "Strategies focused on meaningfully and safely engaging HCPs on social media, promoting interconnectivity across the medical and public health communities on COVID-19 vaccine truths, and sustaining these messaging efforts across vaccine implementation stages will be our best hope of preventing any more missed doses and promoting "misinformation immunity" for all." (Hernandez et al. 2021. "The COVID-19 vaccine social media infodemic: healthcare providers' missed dose in addressing misinformation and vaccine hesitancy.")

8/31/2022

Measures for countering health disinformation

- ❑ As a trusted source of information on vaccines, family physicians play a crucial role in driving vaccine acceptance;
- ❑ Sharing stories, building trust with patients, addressing pain associated with vaccination, presenting vaccination as the default approach early on, focusing on the benefits of protection, and being honest about side effects could also help to promote pro-vaccination attitudes (Shen & Dubey 2019. "Addressing vaccine hesitancy: Clinical guidance for primary care physicians working with parents");
- ❑ It is helpful to provide more information for the patients about the possible disinformation strategies they may deal with, such as manipulating emotions to promote misinformation and conspiracy theories to sow confusion and create division. Inoculation strategy may help to prepare the community by presenting counterarguments to misinformation and raising awareness of negative emotional appeals spread by anti-vaccine campaigns;
- ❑ Framing vaccination as a concrete, actionable strategy to reduce COVID-19 risk may help to address negative emotions, increase self-efficacy and ensure the feelings of control over reducing COVID-19 risk.

Analysis of Tweeters - Super Spreaders

- ❑ Super Spreaders are users which generate content that is shared often, and hence spread information effectively.

8/31/2022

Analysis of Tweeters - Super Friends

- ❑ Super Friends are users that exhibit frequent two-way communication, facilitating large or strong communication networks.

8/31/2022

Analysis of Tweeters - Other Influencers

- Other Influencers are users which have an active network presence, by tweeting often or mentioning users often, and operate in central parts of the conversation, such as by using important hashtags, or mentioning important users.

8/31/2022

Accounts Referenced by the Most Tweets

- This shows the tweeters that are most often referenced (e.g. mentioned) in PA tweets. Value is the number of tweets that reference the agent.
