

MSTV Internship Provider Database
Summer 2022

The purpose of this database is to help MSTV students navigate their start-up internship search. The document is a living document that is updated on a regular basis. Students are responsible for reaching out to providers to initiate the application process. Students are encouraged to reach out to providers on the database but are also welcome to conduct their own search with providers outside of the database. Providers outside of the database must be submitted for approval in order to fulfill the MSTV internship requirement.

Please keep in mind:

- These companies are anticipated to have opportunities for the summer. Due to the nature of start-up environments, opportunities and application dates may change throughout the year depending on a company's needs.
- Professional communication is key when reaching out to providers. You are encouraged to utilize the CPDC to assist you in your outreach.
- If you are interested in an opportunity with a company who has not begun the application process, you are welcome to reach out directly to the point of contact with a statement of interest/for more information about the position.
- The target deadline to have an internship confirmed for the summer is Friday, April 15, 2022.
