

In 2014 Information Systems received a generous gift from Archit Kumar and the Kumar Family. Archit is a 2014 graduate of Dietrich College and the Information Systems Program. The Kumar Family Endowment was given with the intent to commemorate the Information Systems program and as an expression of their interest in seeing its continued success.

In 2015, in honor and recognition of the Kumar Family Endowment, the conference room within the Information Systems suite of offices in Porter Hall was formally named the Information Systems Kumar Conference Room.

In the summer of 2018, the Information Systems Undergraduate Program relocated to Heinz College/Hamburg Hall while still remaining part of Dietrich College. Post relocation in early 2019, a new room within the Information Systems suite of offices has been renamed to continue to honor and pay homage to the generosity of Archit Kumar and the Kumar Family. The Information Systems Program is pleased to announce the naming of the Kumar Student Collaboration Room-Hamburg Hall 3026.

This meeting room is dedicated not only to our Information Systems students but to all who will utilize this space to collaborate and join forces and strategize for the greater good of the Information Systems Program.

Our continued appreciation to Archit and the Kumar Family for the gift that continues to support and enhance the Information Systems Program and its students.
