

Thomas Healy

Thomas Healy is the Founder and CEO of Hyliion, a provider of electrified powertrain solutions for the commercial transportation industry. A leader in the global fight against climate change, Hyliion delivers solutions that negate carbon emissions without sacrificing performance. Named one of Forbes' "30 under 30" and the youngest public company CEO at the time, Healy took Hyliion public in 2020 and has raised over \$750 million to date.

A serial entrepreneur, Healy founded two start-ups prior to Hyliion while he was in college and holds over twenty automotive patents. Healy's passion for racing and motorsports inspired him to pursue dual engineering degrees in mechanical engineering and engineering & public policy from Carnegie Mellon University in 2014. He also started his masters in mechanical engineering at Carnegie Mellon but took a leave of absence to found Hyliion.
