• Panelists Introductions
• Moderated Discussion
• Q & A
• Wrap up: Key Takeaways and Continuing the Conversation
G2U Initiative

The Government-to-University Initiative (G2U) is an innovative approach to addressing critical governance challenges by building structured regional networks of governments and universities.

The initiative aims to catalyze a robust local marketplace that can sustainably connect governments' hiring and research needs with local university capacity.
The goal of this webinar series is to foster connections and share actionable information between people who want to hire great government employees and those who are trying to help students find great jobs.
