Carnegie Mellon’s MSCF, the top-ranked degree program in computational finance, offers comprehensive education in data analytics, financial mathematics, computation, and communications that prepares its graduates for success.

MSCF’s newly renovated New York City campus at 55 Broad St. has attractive spaces for naming by individuals or companies who wish to support the program and make a visible connection to its mission.

Naming donors will be recognized with their names on signage in or directly outside the designated spaces, as well as on a central display in the main foyer. Names will be attached to the space for an eight-year period beginning in January 2018.
