

Dr. Jinho Ahn
Director, National Research Foundation of Korea
Professor, Hanyang University

Jinho Ahn received his B.S. and M.S. degrees from Seoul National University, and Ph.D. degree from the University of Texas at Austin all in Materials Science and Engineering. He worked for Microelectronics Research Laboratory at NEC, Tsukuba, Japan, and joined Hanyang University as a professor of MSE department. He has served as a director of National R&D Program for ‘EUV lithography R&D’ (2002-2012) and ‘Stepper development for display applications’ (2007-2012). He also worked as a Director of international collaboration at Consortium of Semiconductor Advanced Research (2005-2012). And he was a Member of Korea National Science and Technology Council (2010-2012). He has published more than 170 technical papers on professional journals and made more than 270 presentations in technical conferences. His major research interests are nano-patterning technologies and thin film processes. He is serving as a member of organizing committee of EUVL Symposium, EUVL Workshop, and Microprocess and Nanofabrication Conference. Currently, he is a Director of Nano and Convergence Technology at National Research Foundation of Korea, Professor of Hanyang University, Board Member of National Nano Infrastructure Council, Board Member of Korea Synchrotron User Association and Executive Board Member of Texas FUSION Consortium.
