**Abstract**

Recently the 4<sup>th</sup> National Nanotechnology Initiative Program of Korea has been established (Apr. 2016). It is 10 year plan for developing Nanotechnology with vision of “Being a first class country accomplishing sustainable growth through the Innovation in Nanotechnology”.

It is composed of 3 major strategies and 12 projects, 1) Industrialization of Innovation-driven Nanotechnology, 2) Keep the advancement of NT for the Future, 3) Expand Infrastructure for Nanotechnology Innovation. The specification of the each project will be presented with details.

The expected results of the National program are 1) accelerating technology transfer from R&D to Industries, 2) Creating New industries from Nanotechnology, 3) Sustainable Nanotechnology development for next generation.
