

Bio

Wonyup Song is a Ph.D. candidate in the chemical engineering department at Carnegie Mellon University. He is currently working on holistic integration and optimization of multiscale modeling applied to membrane distillations. He is working with professors Myung S. Jhon and Lorenz T. Biegler and has published 3 SCI papers. One of his advisor, Professor Jhon, is the organizer of US-Korea Nanotechnology forum and is very well known in the field of nanotechnology. His bio can be found on the website.

Dr. Lorenz T. Biegler is the department head and professor of chemical engineering at Carnegie Mellon University. He is a member of the National Academy of Engineering and is well-known in the field of optimization. He also wrote a textbook on process systems engineering 'Systematic Methods of Chemical Process Design' with professors Westerberg and Grossman.
