

Dr. Jo-Won Lee
Chair Professor, Department of Convergence Nanoscience
Hanyang University

http://www.contrib.andrew.cmu.edu/org/nanotechnology-forum/Forum_11/CV/Jo-Won_Lee_Bio.pdf

Professor Jo-Won Lee is at the Department of Convergence Nanoscience of Hanyang University. His fields of research are primarily nanoelectronics (CNT, Graphene, nano-flash memory) and neuromorphic system with a variety of experiences such as magnetic recording media/head, high T_c superconducting films and devices, diamond thin films and devices, Prior to his current position, Prof. Lee led the 10 year (2000-2010) national program called Tera-level Nanodevices (\$14M/year) as a director and was a general manager and then a project manager at the Samsung Advanced Institute of Technology (1992-2000). He received his Ph.D. (1986) in metals science from Pennsylvania State University.
