

Byung-Gook Park received his B.S. and M.S. degrees in Electronics Engineering from Seoul National University (SNU) in 1982 and 1984, respectively, and his Ph. D. degree in Electrical Engineering from Stanford University in 1990. From 1990 to 1993, he worked at the AT&T Bell Laboratories. From 1993 to 1994, he was with Texas Instruments. In 1994, he joined SNU as an assistant professor in the Department of Electrical and Computer Engineering, where he is currently a professor.

His current research interests include the design and fabrication of neuromorphic devices and circuits, flash memories, and silicon quantum devices. He has authored and co-authored over 1200 research papers in journals and conferences, and currently holds 107 Korean and 46 U.S. patents. He has served as a committee member on several international conferences, including Microprocesses and Nanotechnology, IEEE International Electron Devices Meeting, International Conference on Solid State Devices and Materials, Silicon Nanoelectronics Workshop (technical program chair in 2005, general chair in 2007), and International Technology Conference on Circuits, Systems, Computers and Communications (technical program chair in 2007, general chair in 2011). He served as an editor of IEEE Electron Device Letters and the editor-in-chief of Journal of Semiconductor Technology and Science. He served as the Seoul Section chair of IEEE (2014) and the president of Institute of Electronics and Information Engineers (2015). He received “Best Teacher” Award from SoEE in 1997, Doyeon Award for Creative Research from ISRC in 2003, and Educational Award from College of Engineering, SNU, in 2006, Haedong Research Award from IEEK in 2008, Best Research Award from SNU in 2015, and Daewon Kang Award in 2017.
