

Biography

Hong Yeol Yoon, Ph.D.

Post-doc

Center for Theragnosis, Biomedical Research Institute

Korea Institute of Sciences and Technology (KIST)

E-mail: seerou@kist.re.kr

Hong Yeol Yoon, Ph.D. was born in Suwon, South Korea in 1987. He graduated in 2010 from Kyung Hee University, South Korea. He obtained his Ph.D. in chemical engineering from Sungkyunkwan University, South Korea, in 2015. Currently, he joined Dr. Ick Chan Kwon and Dr. Kwangmeyung Kim's group and carrying out postdoctoral research at the Korea Institute of Science and Technology (KIST), South Korea.

He was selected as Presidential Post-doctoral Fellowship from National Research Foundation of Korea in the summer of 2017. His research interests are epigenetic molecular editing for cancer theragnosis, multimodal imaging probes for in vivo imaging, and metabolic glycoengineering/bioorthogonal click chemistry-based cell engineering.
