

Ji-Wook Yoon is a postdoctoral research associate in the Department of Materials Science and Engineering at Korea University, with focus on the development of miniaturized breath analyzers for non-invasive disease diagnosis. He received his BS and MS/PhD integrated degrees in Materials Science and Engineering from Korea University in 2011 and 2017, respectively. During his doctoral research under the supervision of Prof. Jong-Heun Lee, he developed various nano-architected oxide chemiresistors for high-performance gas sensors. Between 2017 and 2018, he was a postdoc research fellow at Particle Technology Laboratory in ETH Zürich and performed development of a hand-held breath NH₃ detector. His research interests include various types of semiconductor gas sensors and associated systems.
