

BIOGRAPHICAL STATEMENT

Seongchan Kim is a post-doctoral fellow at Korea Institute of Science and Technology (KIST) in South Korea. He received a bachelor's degree in Chemistry from Soongsil University, and a Doctor's degree in Chemistry from Seoul National University in Seoul of South Korea. His current field placement is with the Center for Biomaterials at Biomedical Research Institute. He is interested in synthesis of biofunctional nanomaterials, distribution patterns in vivo, drug/gene delivery system, biosensors, and nano/bio interfaces system.
