RELEASE NOTES HIGHLIGHTS

SPARCS Proposal & Awards

- **Consolidation of Cost Sharing:** Questions pertaining to any type of cost sharing were consolidated on the Commitment of Additional Resources smartform.

- **Remove Compliance Review Smartform:** The Compliance Review smartform and all related compliance questions (IRB/IACUC/rDNA/Export Controls) were removed from the SPARCS funding proposal. Although the compliance review smartform was removed from SPARCS, proposal submissions are still required to meet/fulfill all sponsor requirements.

- **Add Compliance (Editors/Approvers) Activity:** With the removal of all compliance related questions from SPARCS, this new activity will allow department editors/approvers the ability to record impacted compliance areas to the funding proposal, if needed.

- **Manage Ancillary Review Activity:** This activity was reconfigured to (1) reduce the number of personnel needed to complete an ancillary review, (2) reduce the number of notifications sent, (3) alter the timing of notifications (only when an award is imminent) and (4) places the notification into the users’ SPARCS Integrated Mailbox. The Submitting Department has the opportunity to clean the Ancillary Review list when there are duplications.

- **Foreign Travel – Export Control Review:** Selecting Foreign Travel on the General Costs budgeting grid no longer flags Export Controls as an impacted department. If your funding proposal does have an export control issue, use the Add Compliance activity to alert departmental approvers as needed.
