on Wednesday, December 3, 2019
- Hosted by CMU, all workshop attendees are invited, great opportunity to mingle
- Restaurant and directions
  - Dinner at Casbah
  - <https://casbah.kitchen>
  - 229 South Highland Avenue, Pittsburgh, PA 15206

## Brief Sessions Summary of first day - Key Findings

- First business success areas for Edge Computing: Private LTE + Edge
- Many interesting new edge native applications (drones, gaming etc.)
- Microsoft has updated their edge product portfolio and
  - has started to launch their infrastructure in operator networks
  - Would like to converge their infrastructure with the telco infrastructure at the edge
- Interesting new edge-relevant developments in
  - the technology space (Seagate)
  - The edge infrastructure space (Vapor IO and Stackpath)
- ETSI MEC
  - New activities: New 3<sup>rd</sup> party API's, new MEC Sandbox and many hackathons
- Small Cell Forum
  - Many joint interest areas with OEC
